

# CopyAccountData

This function copies all of the data from one account to another.

## Syntax

```
bool copyAccountData ( account theAccount, account fromAccount )
```

**OOP Syntax** Help! I don't understand this!

**Method:** *account:copyDataTo(...)*

## Required Arguments

- **theAccount:** The account you wish to copy the data *to*.
- **fromAccount:** The account you wish to copy the data *from*.

## Returns

Returns a *true* if the accounts were valid, *false* otherwise.
