

GuiGridListSetSortingEnabled

This function allows the disabling or enabling of *sorting* within a gridlist. Sorting is achieved by clicking a column header. Gridlist items will be sorted according to the clicked column. By default, gridlists have sorting enabled. This function will allow you to toggle this.

Syntax

```
bool guiGridListSetSortingEnabled ( element guiGridlist, bool enabled )
```

OOP Syntax [Help! I don't understand this!](#)

Method: *GuiGridList:setSortingEnabled(...)*

Variable: *.sortingEnabled*

Required Arguments

- **guiGridlist:** The GUI gridlist you wish to toggle the sorting of.
- **enabled:** A boolean representing whether the sorting is enabled, or disabled.

Returns

Returns *true* if sorting was successfully toggled., *false* otherwise.
