

DbFree

This function frees a database query handle. dbFree only needs to be used if a result has not been obtained with dbPoll

Syntax

```
bool dbFree ( handle queryHandle )
```

OOP Syntax [Help! I don't understand this!](#)

Method: *queryHandle:free(...)*

Required Arguments

- **queryHandle:** A query handle previously returned from dbQuery

Returns

Returns *true* if the handle was successfully freed, *false* otherwise.
