

# GetElementColShape

Some elements have an associated colshape, for example Marker and Pickup. This function is used to get the associated colshape.

## Syntax

```
colshape getElementColShape ( element theElement )
```

**OOP Syntax** Help! I don't understand this!

**Method:** *element:getColShape(...)*  
**Variable:** *.colShape*

## Required Arguments

- **theElement:** The element you want to get the colshape of

## Returns

Returns *colshape* of the element, *false* if not or an invalid argument was passed to the function.
