

# RemoveResourceFile

This function removes a file from the resource.

## Syntax

```
bool removeResourceFile ( resource theResource, string fileName )
```

**OOP Syntax** Help! I don't understand this!

**Method:** *resource:removeFile(...)*

## Required Arguments

- **theResource:** The resource element.
- **fileName:** The filename what you wan't to delete.

## Returns

Returns *true* if file was deleted, otherwise *false* if the resource is in use or the file doesn't exist.
