

AclGroupListACL

This function returns a table over all the ACL's that exist in a given ACL group.

Syntax

table aclGroupListACL (aclgroup theGroup)

OOP Syntax [Help! I don't understand this!](#)

Method: *aclgroup:listACL(...)*

Variable: *.aclList*

Required Arguments

- **theGroup:** The ACL group to get the ACL elements from

Returns

Returns a table of the ACL elements in the given ACL group. This table might be empty. Returns *false* or *nil* if theGroup is invalid or it fails for some other reason.
