

DoesPedHaveJetPack

This function is deprecated. This means that its use is discouraged and that it might not exist in future versions.

Please use `isPedWearingJetpack` instead.

Checks whether or not a ped currently has a jetpack.

Syntax

```
bool doesPedHaveJetPack ( ped thePed )
```

OOP Syntax Help! I don't understand this!

Method: *ped:doesHaveJetpack(...)*

Required Arguments

- **thePed:** the ped you want to check

Returns

Returns *true* if the ped is carrying a jetpack, *false* if he is not or an invalid element was passed.
