

# IsElementLocal

This function checks whether a clientside element is local to the client (doesn't exist in the server) or not.

## Syntax

```
bool isElementLocal ( element theElement )
```

**OOP Syntax** Help! I don't understand this!

**Method:** *element:isLocal(...)*  
**Variable:** *.localElement*

## Required Arguments

- **theElement:** The element that we want to check.

## Returns

Returns *true* if the passed element is local, *false* if not or if invalid parameters are passed.
