

OnUnban

This event is triggered when a ban is removed from the server.

if the ban was removed using function `removeBan`, and the `responsibleElement` was not specifying, the event will return `nil`.

Parameters

`ban` `theBan`, `player` `responsibleElement`

- **theBan** : the ban that will be removed.
- **responsibleElement**: the player who removed the ban, otherwise returns *nil*.

Source

The source is always the global root element.

Cancel effect

If this event is canceled, the requested unban is not performed.
