

DeleteResource

This function deletes a resource from the NRP memory and moves it to the **/resources-cache/trash/** directory.

Syntax

```
bool deleteResource ( string resourceName )
```

OOP Syntax [Help! I don't understand this!](#)

Note: *This function is a static function underneath the Resource class.*
Method: *Resource.delete(...)*

Required Arguments

- **resourceName:** The name of resource to delete.

Returns

Returns *true* if the resource has been deleted successfully, *false* otherwise.
