

# ToggleBrowserDevTools

This function toggles the visibility of the developer tools pane.

**Note:** You should do a 'setDevelopmentMode(true, true)' before using this function.

## Syntax

```
bool toggleBrowserDevTools ( browser webBrowser, bool visible )
```

**OOP Syntax** [Help! I don't understand this!](#)

**Method:** *browser:toggleDevTools(...)*

**Variable:** *.devTools*

## Required Arguments

- **webBrowser:** The browser
- **visible:** *true* to show the tools, *false* to hide

## Returns

Returns *true* if the visibility was successfully toggled, *false* if an error occurred
