

GetResourceLastStartTime

Used to check the last starting time and date of a resource

Syntax

```
int getResourceLastStartTime ( resource theResource )
```

OOP Syntax [Help! I don't understand this!](#)

Method: *resource:getLastStartTime(...)*

Variable: *.lastStartTime*

Required Arguments

- **theResource:** The resource of which you'd like to check the last starting time.

Returns

If successful, returns the UNIX timestamp when the resource was last started, or the string "never" if the resource has not been started yet, otherwise false. Use in conjunction with `getRealTime` in order to retrieve detailed information.
