

SetDiscordApplicationID

Important Note: To reset the application ID, please use `resetDiscordRichPresenceData`

Important Note: In order for the function to work correctly, the user must have their activity privacy/status enabled in Discord.

ADDED/UPDATED IN VERSION 1.6.0 r22270:

The function can assign your own application to use in Rich Presence. You can create an application **here**

Syntax

```
bool setDiscordApplicationID(string applicationID)
```

OOP Syntax [Help! I don't understand this!](#)

Method: *DiscordRPC:setApplication(...)*

Required arguments

- **applicationID:** a string representing your Discord application's ID.

Returns

Returns *true* if function succeeds, *false* if the client has disabled rich presence.
