

SetChatboxCharacterLimit

Sets the maximum amount of characters that can be input via chatbox

Syntax

```
bool setChatboxCharacterLimit(int charLimit)
```

OOP Syntax Help! I don't understand this!

Method: *GuiElement.setChatboxCharacterLimit(...)*

Variable: *.chatboxCharacterLimit*

Counterpart: *getChatboxCharacterLimit*

Required Arguments

- **charLimit:** an integer between 0-255. Passing -1 will reset the character limit (96)

Returns

Returns *true* if the character limit was set, *false* otherwise
