

# AclGroupList

This function returns a table of all the ACL groups.

## Syntax

table aclGroupList ()

**OOP Syntax** Help! I don't understand this!

**Note:** *This function is a static function underneath the ACL Group class.*

**Method:** *ACLGroup.list(...)*

## Returns

Returns a table of all the ACL groups if successful, returns an empty table if no ACL groups exist. *false/nil* can be returned if this function fails for some other reason.
