

Client-side function

GuiCheckBoxGetSelected

This function gets a checkbox's selection state.

Syntax

```
bool guiCheckBoxGetSelected ( element theCheckbox )
```

OOP Syntax Help! I don't understand this!

Method: *GuiCheckBox:getSelected(...)*

Variable: *.selected*

Counterpart: *guiCheckBoxSetSelected*

Required Arguments

- **theCheckbox** : The checkbox you wish to retrieve the selection state of.

Returns

Returns *true* if the checkbox is selected, *false* if it is not.
