

# AclDestroyGroup

This function destroys the given ACL group. The destroyed ACL group will no longer be valid.

## Syntax

```
bool aclDestroyGroup ( aclgroup aclGroup )
```

**OOP Syntax** Help! I don't understand this!

**Method:** *aclgroup:destroy(...)*

## Required Arguments

- **aclGroup:** The aclgroup element to destroy

## Returns

Returns *true* if the ACL group was successfully deleted, *false* if it could not be deleted for some reason (ie. invalid argument).
