

IsResourceArchived

Checks whether the specified resource is archived. (Currently running from a ZIP file)

Syntax

```
bool isResourceArchived(resource resourceElement)
```

OOP Syntax Help! I don't understand this!

Method: *resource:isArchived(...)*

Variable: *.archived*

Required Arguments

- **resourceElement:** The resource to check.

Returns

Returns **true** if the selected resource is archived, **false** if it is not archived, and **nil** if some kind of problem occurred.
