

GetVehicleCompatibleUpgrades

This function returns a table of all the compatible upgrades (or all for a specified slot, optionally) for a specified vehicle.

Syntax

```
table getVehicleCompatibleUpgrades ( vehicle theVehicle [, int slot ] )
```

OOP Syntax [Help! I don't understand this!](#)

Method: *vehicle:getCompatibleUpgrades(...)*
Variable: *.compatibleUpgrades*

Required Arguments

- **theVehicle:** the vehicle you wish to retrieve the list of compatible upgrades of.

Optional Arguments

- **slot:** the upgrade slot number for which you're getting the list (from 0 to 16). Compatible upgrades for all slots are listed if this is not specified.

Returns

Returns a *table* with all the compatible upgrades, or *false* if invalid arguments are passed.
