

GetBrowserSettings

This function returns a table containing the browser settings.

Syntax

table `getBrowserSettings` ()

OOP Syntax [Help! I don't understand this!](#)

Method: *Browser.getSettings(...)*

Returns

A table having the following keys:

- **RemoteEnabled:** *true* if remote websites are enabled, *false* otherwise
- **RemoteJavascript:** *true* if Javascript is enabled on remote websites, *false* otherwise
- **PluginsEnabled:** *true* if plugins such as Flash, Silverlight (but not Java) are enabled, *false* otherwise. This setting is *false* by default.
