

# AclReload

This function reloads the ACL's and the ACL groups from the ACL XML file. All ACL and ACL group elements are invalid after a call to this and should not be used anymore.

## Syntax

```
bool aclReload ()
```

**OOP Syntax** Help! I don't understand this!

**Note:** *This function is a static function underneath the ACL class.*

**Method:** *ACL.reload(...)*

## Returns

Returns *true* if the XML was successfully reloaded from the file, *false* or *nil* if the XML was invalid, didn't exist or could not be loaded for some other reason.
