

GuiGridListRemoveColumn

This allows you to delete columns that exist in grid lists.

Syntax

```
bool guiGridListRemoveColumn ( element gridList, int columnIndex )
```

OOP Syntax Help! I don't understand this!

Method: *GuiGridList:removeColumn(...)*

Required Arguments

- **gridList:** The grid list you want to remove a column from
- **columnIndex:** Column ID

Returns

Returns *true* if the grid list column was successfully removed, *false* otherwise.
