

# GetElementAttachedTo

This function determines the element that the specified element is attached to.

## Syntax

element getElementAttachedTo ( element theElement )

**OOP Syntax** Help! I don't understand this!

**Method:** *element:getAttachedTo(...)*

## Required Arguments

- **theElement:** The element you require the information for.

## Returns

Returns the element that the chosen element is attached to, or *false* if the element isn't attached to another element.
