

Client-side function

SetPedsLODDistance

This function sets the peds LOD distance.

60 units

100 units

500 units

Syntax

```
bool setPedsLODDistance ( float distance )
```

Required arguments

- **distance:** the new peds LOD distance. This value is clamped to **0** – **500**. (Default for *high_detail_peds* on is **500**, when off, it is **60**).

Returns

This function returns *true* if the argument is valid. Returns *false* otherwise.
