

GetSoundMetaTags

Used to get the meta tags attached to a sound. These provide information about the sound, for instance the title or the artist.

Note:

- This function does not work on remote WAV files

Syntax

```
table getSoundMetaTags ( element sound [, string format = "" ] )
```

OOP Syntax [Help! I don't understand this!](#)

Method: *sound:getMetaTags(...)*

Required Arguments

- **sound:** a sound element.

Optional Arguments

NOTE: When using optional arguments, you might need to supply all arguments before the one you wish to use. For more information on optional arguments, see optional arguments.

- **format:** a filter string to get a specific meta tag.

Returns

Returns a table, but only a string if **format** is given, with all data available (keys are listed below) for the sound if successful, *false* otherwise. If any data is unavailable then the associated key is not written to the table.

- **title**
- **artist**
- **album**
- **genre**
- **year**
- **comment**
- **track**
- **composer**
- **copyright**
- **subtitle**
- **album_artist**
- **stream_name**
- **stream_title**
