

GuiGridListSetHorizontalScrollPosition

This function is used to set the horizontal scroll position from a grid list

Syntax

```
bool guiGridListSetHorizontalScrollPosition ( element guiGridlist, float fPosition )
```

OOP Syntax Help! I don't understand this!

Method: *GuiGridList:setHorizontalScrollPosition(...)*

Variable: *.horizontalScrollPosition*

Counterpart: *guiGridListGetHorizontalScrollPosition*

Required Arguments

- **guiGridlist:** The grid list you want to set the horizontal scroll position from
- **fPosition:** A float representing the horizontal scroll position (0-100)

Returns

Returns *true* if the horizontal scroll position was set, or *false* otherwise.
