

GetVehicleModelExhaustFumesPosition

This function returns the position of the exhaust fumes the vehicle model emits.

Syntax

float, float, float getVehicleModelExhaustFumesPosition (int modelID)

OOP Syntax Help! I don't understand this!

Method: *Vehicle.getModelExhaustFumesPosition(...)*
Counterpart: *setVehicleModelExhaustFumesPosition*

Required Arguments

- **modelID:** The vehicle model ID.

Returns

Returns the position of the exhaust fumes if everything went fine or *false* otherwise.
