

# GetElementType

This function is used to retrieve the type of an element.

## Syntax

```
string getElementType ( element theElement )
```

**OOP Syntax** Help! I don't understand this!

**Method:** *element:getType(...)*

**Variable:** *.type*

## Required Arguments

- **theElement:** The element you wish to get the type of.

## Returns

Returns a *string* containing the element type, *false* if invalid arguments were passed.
