

# Utf8.title

**Note:** You may want to read up on case folding for more information about the use of this function.

Converts a UTF-8 string to title case (uppercase). If *input* is an integer, it is treated as a codepoint and a converted codepoint (integer) is returned.

## Syntax

```
string utf8.title ( string|int input )
string utf8.upper ( string|int input )
```

## Required Arguments

- **input:** A string character sequence OR an integer value

## Returns

Returns a *string* in uppercase OR returns an *integer* (see description).
