

Shared function

ResetFarClipDistance

This function resets the far clip distance to its default state.

Note: The function will not reset far clip distance client-side, unless it is relying on a value set by the server.

Note: The function will reset the far clip distance to *false* server-side, as there is no default value to begin with.

Syntax

```
bool resetFarClipDistance ( )
```

Returns

Returns *true* if operation was successful, *false* otherwise.
