

Client-side function

GuiScrollPaneSetScrollBars

This function allows a scrollpane's scrollbars to be forced **on**, or returned to default.

Syntax

```
bool guiScrollPaneSetScrollBars ( element scrollPane, bool horizontal, bool vertical )
```

Required Arguments

- **scrollPane:** the GUI scrollpane element you want to set the scrollbars of.
- **horizontal:** A bool where true forces the horizontal scrollbar on, and false returns them to default.
- **vertical:** A bool where true forces the vertical scrollbar on, and false returns them to default.

Returns

Returns *true* if the call was successfully, *false* otherwise.
