

GuiMemoSetVerticalScrollPosition

This function is used to set the vertical scroll position of a memo as a percentage.

Syntax

```
bool guiMemoSetVerticalScrollPosition ( gui-memo theMemo, float position )
```

OOP Syntax Help! I don't understand this!

Method: *GuiMemo:setVerticalScrollPosition(...)*

Variable: *.verticalScrollPosition*

Counterpart: *guiMemoGetVerticalScrollPosition*

Required Arguments

- **theMemo:** the memo you want to change the vertical scroll position of.
- **position:** a float ranging between 0 and 100.

Returns

Returns **true** if the position was set, **false** otherwise.
