

GuiGridListRemoveRow

This allows you to delete rows that exist in grid lists.

Syntax

```
bool guiGridListRemoveRow ( element gridList, int rowIndex )
```

OOP Syntax Help! I don't understand this!

Method: *GuiGridList:removeRow(...)*

Required Arguments

- **gridList:** The grid list you want to remove a row from
- **rowIndex:** The row ID which you want to remove

Returns

Returns *true* if the grid list row was successfully removed, *false* otherwise.
