

IsCoronaReflectionEnabled

This function gets visibility of corona reflection.

Syntax

```
bool isCoronaReflectionEnabled ( marker theMarker )
```

OOP Syntax Help! I don't understand this!

Method: *Marker:isCoronaReflectionEnabled(...)*

Counterpart: *setCoronaReflectionEnabled*

Required Arguments

- **theMarker:** marker

Returns

- Returns *false* if marker type is not *corona*.
- Returns *true* if corona reflection is enabled, *false* otherwise.
