

GuiLabelSetHorizontalAlign

This function sets the horizontal alignment of a text label.

Syntax

```
bool guiLabelSetHorizontalAlign ( element theLabel, string align, [ bool wordwrap = false ] )
```

OOP Syntax [Help! I don't understand this!](#)

Method: *GuiLabel:setHorizontalAlign(...)*

Variable: *.horizontalAlign*

Required Arguments

- **theLabel:** The text label to set the horizontal alignment on.
- **align:** The alignment type. Valid type strings are:
 - "left"
 - "center"
 - "right"
- **wordwrap:** Whether or not to enable wordwrap for the gui-label.

Returns

Returns *true* on success, *false* otherwise.
