

GuiRadioButtonGetSelected

This function gets a radio button's selection state.

Syntax

```
bool guiRadioButtonGetSelected( element guiRadioButton )
```

OOP Syntax Help! I don't understand this!

- Method:** *GuiRadioButton:getSelected(...)*
- Variable:** *.selected*
- Counterpart:** *guiRadioButtonSetSelected*

Required Arguments

- **guiRadioButton:** The radio button you wish to retrieve the selection state of.

Returns

Returns *true* if the radio button is selected, *false* if it is not.
