

GuiGridListSetScrollBars

This function allows a gridlist's scrollbar to be forced **on**, or returned to default.

Syntax

```
bool guiGridListSetScrollBars ( element guiGridlist, bool horizontalBar, bool verticalBar )
```

OOP Syntax Help! I don't understand this!

Method: *GuiGridList:setScrollBars(...)*

Required Arguments

- **guiGridlist:** The GUI gridlist you wish to change the state of scrollbars
- **horizontalBar:** A bool where *true* forces the horizontal scrollbar on, and *false* returns them to default.
- **verticalBar:** A bool where *true* forces the verical scrollbar on, and *false* returns them to default.

Returns

Returns *true* if the scrollbars were successfully set, *false* otherwise.
