

Client-side function

GuiGridListClear

This function clears all the data from a grid list.

Syntax

```
bool guiGridListClear ( element gridList )
```

OOP Syntax Help! I don't understand this!

Method: *GuiGridList:clear(...)*

Required Arguments

- **gridList:** The grid list element to be cleared

Returns

Returns *true* if the grid list element is valid and has been cleared successfully, *false* otherwise.
