GuiLabelSetVerticalAlign

This function sets the vertical alignment of a text label.

Syntax

```
bool guiLabelSetVerticalAlign ( element theLabel, string align )
```

OOP Syntax Help! I don't understand this!

> **Method**: *GuiLabel:setVerticalAlign(...)*
> **Variable**: *.verticalAlign*

Required Arguments

- **theLabel:** The text label to set the vertical alignment on.
- **align:** The alignment type. Valid type strings are:
    - "top"
    - "center"
    - "bottom"

Returns

Returns *true* on success, *false* otherwise.
