GetAccounts

This function returns a table over all the accounts that exist in the server internal.db file. (Note: accounts.xml is no longer used after version 1.0.4)

Syntax

```
table getAccounts ()
```

OOP Syntax Help! I don't understand this!

> **Note**: *This function is a static function underneath the Account class.*
> **Method**: *Account.getAll(...)*

Returns

A table over the accounts that exist in the server internal.db file. This table might be empty.
