Shutdown

This function shuts down the server.

Make sure your server ACL setup has function.shutdown object protected.

Syntax

```
bool shutdown ( [ string reason = "No reason specified" ] )
```

```
bool shutdown ( [ string reason = "No reason specified", number exitCode = 0 ] )
```

Optional Arguments

- **reason:** the reason why the server has been shutdown.
- **exitCode:** the server application exit code to be returned on shutdown.

Returns

Returns *false* if it was not possible to shut down the server.
