EngineRemoveImage

> **ADDED/UPDATED IN VERSION 1.6.0 r21708:**
> This function disables streaming from an IMG container.

Syntax

```
boolean engineRemoveImage ( img img_file )
```

OOP Syntax Help! I don't understand this!

> **Method**: *img:remove(...)*

Required Arguments

- **img_file**: The IMG file you want to remove.

Returns

Returns *true* if stremaing from IMG file was successfully disabled, *false* otherwise.
