GuiMemoGetVerticalScrollPosition

This function is used to get the vertical scroll position of a memo as a percentage.

Syntax

```
float guiMemoGetVerticalScrollPosition ( gui-memo theMemo )
```

OOP Syntax Help! I don't understand this!

>   **Method**: *GuiMemo:getVerticalScrollPosition(...)*
>   **Variable**: *.verticalScrollPosition*
>   **Counterpart**: *guiMemoSetVerticalScrollPosition*

Required Arguments

* **theMemo**: the memo you want to know the vertical scroll position of.

Returns

Returns a float ranging between 0 and 100, or **false** otherwise.
