GuiGridListGetItemColor

This function gets the color of a gridlist item.

Syntax

```
int int int int guiGridListGetItemColor ( element gridList, int rowIndex, int columnIndex )
```

OOP Syntax Help! I don't understand this!

> **Method**: *GuiGridList:getItemColor(...)*

Required Arguments

- **gridList:** The grid list element
- **rowIndex:** Row ID
- **columnIndex:** Column ID

Returns

Returns four *int* values, representing the amount of red, green, blue and alpha if successful. *false* otherwise.
