OnClientResourceFileDownload

This event is triggered every time a resource file download is queued, finished or has failed.

> ⚠️ **Warning:** This event is **NOT** related to downloadFile and onClientFileDownloadComplete!

Parameters

```
resource fileResource, string fileName, int fileSize, string state
```

- **fileResource:** Resource the file belongs to.
- **fileName:** Relative resource file path.
- **fileSize:** Size of the file in bytes.
- **state:** Possible values: `"queued"` or `"finished"` or `"failed"`.

Source

The source of this event is the resource's root element.
