GuiSetSelectedTab

This function is used to change the currently selected tab in a tab panel.

Syntax

```
bool guiSetSelectedTab ( element tabPanel, element theTab )
```

Required Arguments

- **tabPanel:** The tab panel which current tab you want to change.
- **theTab:** The tab which will be the new active tab.

Returns

Returns *true* if the selected tab was changed to a new one successfully, *false* otherwise.
