# SetDebugViewActive

This function enables or disables the debug window.

## Syntax

```
bool setDebugViewActive ( bool enabled )
```

**OOP Syntax** Help! I don't understand this!

>**Method**: *GuiElement.setDebugViewActive(...)*
>**Variable**: *.debugViewActive*
>**Counterpart**: *isDebugViewActive*

## Required Arguments

- **enabled:** true if debug window should be visible, false otherwise.

## Returns

Returns *true*, *false* if invalid parameters are passed.
