EngineResetModelFlags

> **ADDED/UPDATED IN VERSION 1.6.0 r21695:**
> This function restores model flags to default state.

Syntax

```
boolean engineResetModelFlags( int modelID )
```

OOP Syntax Help! I don't understand this!

> **Method**: *Engine.resetModelFlags(...)*

Required Arguments

- **modelID**: ID of the model you want to reset.

Returns

Returns *true* if model flags was successfully restored, *false* otherwise.
