GetAllAccountData

This function returns a table containing all the user data for the account provided

Syntax

```
table getAllAccountData ( account theAccount )
```

OOP Syntax Help! I don't understand this!

>**Method**: *account:getAllData(...)*
>**Variable**: *.data*

Required Arguments

- **theAccount:** The account you wish to retrieve all data from.

Returns

A table containing all the user data. This table might be empty.
