GetBanTime

This function will return the time the specified ban was created, in **seconds**.

Syntax

```
int getBanTime ( ban theBan )
```

OOP Syntax Help! I don't understand this!

> **Method**: *ban:getTime(...)*
> **Variable**: *.time*

Required Arguments

- **theBan:** The ban of which you wish to retrieve the time of.

Returns

- Returns an integer of the banning time in the format of seconds from the year 1970. Use in conjunction with getRealTime in order to retrieve detailed information.
- Returns **false** if invalid arguments were specified or if there was no banning time specified for the ban.
